October 14, 2026

Dear Landowner:

As part of its vegetation management program, **Consumers Energy** has scheduled the herbicide treatment described below for its distribution system in Kent County. A records search indicates this line crosses your property in Tyrone Township.

As a follow-up to re-clearing of trees and brush performed recently, a low-volume herbicide application has been scheduled for the power line right-of-way crossing your property. The herbicide mix will be applied as either a hand spray treatment or UTV mounted sprayer, selectively treating re-sprouting new growth of trees and brush as needed throughout the right-of-way.

Crop areas, gardens and residential mowed yard areas will be avoided. It is our intent to minimize impact to properties along the right-of-way as a part of our vegetation management program.

Herbicides that will be used are a combination of the following: Garlon 3A (active -ingredient: Triclopyr), Milestone (AI: Aminopyralid), Escort XP (AI: Metsulfuron Methyl), Garlon 4 Ultra (AI: Triclopyr), and Stalker (AI: Isopropylamine Salt of Imazapyr), with water or basal oil as a diluent. Please keep people and pets off treated areas until sprays have dried. There are no restrictions on your use of the treated area after the material has dried on the plant.

All applications in this area will be completed during the months of November/December.

Thunder Bay Tree Service, LLC has been contracted to perform this work. Any questions you may have should be directed to:
